## Contex IQ technology

Contex IQ scanners use the latest in high-quality CIS modules with Contex Dual Diffusion.

This combined with xDTR, CFR and Sigma provides the best quality CIS scans in the market.

Contex IQ models are designed for line drawings, maps and other technical documents.

Designed for optimal ergonomic working environment: Height adjustable stand in 3 positions.

Color Fringing is a natural consequence of CIS technology sequentially flashing R-G-B. Contex patented CFR removes this problem with advanced filter technology.
